

PlastiLitter

URINE SAMPLE COLLECTOR

- Neutral PH
- Non-Toxic
- Non-Absorbant
- Will not alter specimen color

PlastiLitter is the simple way to collect feline urine samples.

PlastiLitter is available in two sizes: 6-pack boxes and one gallon containers. PlastiLitter is for both out-patient and in hospital use. Easy transfer to leakproof sample urine cups are supplied. The disposable litter granules are designed to lift urine for easy retrieval. PlastiLitter makes obtaining feline urine samples easy.

To simulate standard litter, place a few ounces of PlastiLitter into a clean plastic litter box or pan. The pellets will allow for retrieval of urine, stool, vomit or other specimen satisfactory for most laboratory evaluations.

Directions:

Pour PlastiLitter granules into clean litter pan. Allow feline to urinate in pan. Urine, stool, vomit or other specimen will easily pour off granules into sample cup supplied. Dispose of litter.

ITEM #	DESCRIPTION	UNIT
